

THE LAST WEEKS IN QUARANTINE

I usually got up at 6.45 a.m. I dressed myself, washed my face and teeth and ate breakfast. At 7.30 I went by bus to Miren Primary School.

In the afternoon I usually played basketball with my friends, studied and did my homework. In the evening I played computer games like Fortnite and watched videos on You Tube. Sometimes I would read a book.

Now, my daily routine has changed. I get up at 8 a.m. and then I eat breakfast. At 9 o'clock I start studying for school. At 1 p.m. my family has lunch together. My mother and father work from home, but my dad is going to start working at a firm on the 7th April. After lunch I have a break. I go on the trampoline or go cycling. In the afternoon I study for school. When I finish, I go outside on the trampoline or help my father build a wooden house. I also mow the grass every two weeks.

What I like best about this unusual situation and home schooling is I can sleep longer, we don't have any tests and there are no questionings. I can eat when I am hungry and I don't have headaches anymore.

I miss my friends and classmates. I also miss my grandmother, grandfather and my cousin Franc. I keep in contact with my friends through the internet and with my grandmother and grandfather through the telephone.

The positive thing in this situation is spending more time with my family, sleeping more and going to sleep at a later time. We talk and smile more with my family, we also watch films and series together and I help my father build the wooden house.

The negative thing in this situation is that we cook and eat a lot. My sister and mother bake biscuits, pancakes, cookies, Easter ham etc. I am afraid I will get fat.

My mom also helps me and my sister with school work, so everyone is very busy. The time goes by quickly and we never get bored.
